

# Core Competency

The EMME Security Group started out as the Matatag Security Agency in 1981. Later, the company expanded as Emirate Security & Maintenance Systems, Inc. in 1992. After three years of successful operations, a sister company was established – the Emeritus Security & Maintenance Systems, Inc. – to cater to the growing needs of clients. Subsequently, with the increasing demand for quality services, new agencies were welcomed into the fold – EMME, Emirate Security Specialists, Inc., and Emerald – under the umbrella of the EMME Security Group

With five security agencies, the Group provides the brand of excellence in security services to a wider market with each agency having its own designated geographical area. At present, the Group has a combined security force of some 3,000 officers and guards.

The Group's core service is to supply high-performing security guards and officers providing quality security services ensured by maintaining strict hiring standards that include stringent Neuro-Psychiatric and Physical Tests.

The Group has also its own Performance Appraisal System and Certified Security Professional (CSP) Scholarship Program and requires all guards to undergo own certified training program prior to renewal of licensing.

The Group deploys its own Area Inspectors conducting random inspections on all detachments and maintains as well its own Special Action Team (SAT) to respond to emergency situations for investigation purposes.

Besides these core competencies, the Group also renders other security related services addressing the varying security needs of clients including but not limited to:

- \* VIP Drivers and Escorts
- \* K-9 Teams
- \* Armored Cars with Drivers and Escorts
- \* CCTV / Telephone Operators
- \* Background Investigation
- \* Receptionists

As a matter of course, the EMME Security Group deploys officers and guards to clients meeting their specific requirements. Thus, after undergoing the mandatory Neuro-Psychiatric and Physical Tests and Drug Test from accredited clinics, the Group conducts pre-employment training responsive to the prospective assignment for the officers and guards. After their successful deployment, the Group continually develops its officers and guards to the caliber embedded in its vision through holding of regular refresher training courses, among other means, on both general modules such as rekindling moral values and attitudes and technical modules such as weapons handling and emergency situations management.

The EMME Security Group has established the EMME Security Group Training Center, Inc. (ESGTCI) accredited with TESDA in order to meet the training needs of officers and guards as required and as requested by clients in line with its vision of becoming the top provider of security services in the country and in the region. Accordingly, the ESGTCI's Program of Instruction offers a wide range of courses from pre-licensing to supervisory to customer relations, and to the more specialized ones such as Theory and Practice of VIP Protection, all handled by competent and credible instructors well-respected in the industry. The ESGTCI's main facilities are located at the Laguna International Industrial Park in Canlubang, Laguna with two classrooms, an office, and a spacious training ground as well as barracks for the trainees, and a firing range for target practice under construction.

Aside from developing its people, the Group also motivates them by providing the benefits due them in a timely manner including financial assistance via non-interest bearing loans during times of emergencies and extreme necessities.

# Equipment

The EMME Security Group provides only the best for the best, keeping up to date with the state-of-the-art in security technology.

The Group's officers and guards use Llama, Norinco and Armscor pistols for sidearms, Armscor 12-gauge shotguns in subdivisions and commercial buildings, Armalite M-16 and M-14 in banks and armored cars, and 30 caliber rifles in outlying areas.

In addition, the Group also maintains a fleet of various vehicles, ambulances, motorcycles and mountain bikes for the different needs of its detachments.

The Group believes that a good communications system is one of the key security factors in safeguarding an area. Thus, it keeps a low guard-to-radio ratio with all its handheld radios of the top-of-the-line Motorola brand and has two UHF radio repeater systems located in San Mateo, Rizal servicing Bulacan and Metro Manila areas and in Tagaytay City covering the CALABARZON area with mobile dual frequency VHF/UHF base radios.

# Achievements

Commitment spells the difference between just having officers and guards and actually being safe and secure.

The EMME Security Group prides itself with such commitment and dedication towards clients' safety and security. Not surprisingly in 1999, the Group was awarded by the PNP Civil Security Group as one of the Top 10 Most Outstanding Security Agencies in the Philippines, and was the recipient further of the "Award of Excellence" from the same group in 2003.

Aside from being recognized by the Philippine National Police, the Group has been continuously receiving accolades through various awards and commendations for exemplary performance and services from its clients.

Since 2000, the EMME Security Group has proven its commitment to excellence when its Greenbelt Mall Detachment was awarded as the Best Detachment in Makati sector and its Southvale Village Detachment as the Best Detachment in the Ayala Alabang sector. The Group's Detachment Commanders assigned in the said units have been garnering the Best Detachment Commander Award.

The Group's Detachment Commanders and Security Personnel have also been cited with numerous plaques attesting to their continuous dedication and excellence in serving clients and business partners.

In the fullness of time, the EMME Security Group together with affiliate companies and partners providing interrelated security services shall then become a total security company.
